

CCollisionManager::Init

CCollisionManager::  
InitBox

COBBoxCollision::InitModelBox

```
graph LR; A[CCollisionManager::Init] --> C[COBBoxCollision::InitModelBox]; B[CCollisionManager::InitBox] --> C;
```

The diagram illustrates two calls to the `COBBoxCollision::InitModelBox` function. On the left, two boxes represent the calling methods: `CCollisionManager::Init` (top) and `CCollisionManager::InitBox` (bottom). On the right, a shaded box represents the target function `COBBoxCollision::InitModelBox`. Two blue arrows point from the right side of the left boxes to the left side of the shaded box, indicating the call sequence.
